Stretch Evolve Smart SIE Sweden

Stretch Evolve Smart SIE Sweden | Content for SAP Cloud ERP

✓ SIE Export (Type 4)

Stretch Evolve Smart SIE Sweden | Introduction

- SIE (Standard Import and Export) is a set of file formats used to easily transfer accounting data between different software systems in a way that is completely independent of software vendors. SIE is an open format.
- Since SIE files are used in Sweden by Swedish companies to export accounting data to, for example, auditors, there is a need for this functionality regardless of the ERP system used.
- SIE files are not subject to any legal requirements or local regulations and are therefore not included in SAP's localization functions for Sweden. To meet the needs of Swedish customers implementing SAP S/4 HANA Public Cloud, Stretch Evolve has developed an application to handle the export of accounting data according to the SIE file format (SIE4E).

Stretch Evolve Smart Finance Sweden | Roadmap

- SIE import
- Add more dimensions to SIE 4 file (Like cost center and project)
